SOLID WASTE FACILITY PERMIT

Facility/Permit Number:

37-AA-0964**12. Legal Description of Facility:**

EDCO Recycling, 6700 Federal Blvd, Lemon Grove, CA 91945; Assessor Parcel Numbers 4781603400.

13. Findings:

- a) A County-wide Integrated Waste Management Plan was approved by the California Integrated Waste Management Board on September 2005. Pursuant to Public Resources Code (PRC) §50001(a)(2), the facility is identified in the City of Lemon Grove's nondisposal facility element, which has been approved pursuant PRC §41800.
- b) The LEA has determined that the design of the facility will allow for the facility operations to be conducted in compliance with the State Minimum Standards for Transfer/Processing Operations and Facilities, based on a review of the January 2010 Transfer Processing Report and an inspection conducted on March 18, 2010.
- c) This permit is consistent with standards adopted by the CalRecycle. Public Resources Code, §44010.
- d) The LEA has reviewed and considered the information, including the environmental effects of issuing this Solid Waste Facility Permit for the existing materials recovery facility for commingled and source separated recyclables. The LEA filed a Notice of Exemption on April 26, 2010 for the continued operation of this facility and finds that there are no significant environmental effects arising out of the issuance of this Solid Waste Facility Permit. A Notice of Determination will be filed with the State Clearinghouse.

14. The following documents also describe and restrict the operation of this facility:

	Date		Date
Transfer Processing Report	<u>Jan 2010</u>	Notice of Intent - WDID 9 37S004665	<u>Sept. 1999</u>
Notice of Exemption	<u>Apr 2010</u>		

15. Prohibitions:

The permittee is prohibited from accepting anything other than commingled/source separated recyclable materials.

16. LEA Conditions:

- a) The operator shall comply with all the State Minimum Standards for solid waste handling.
- b) No significant change in design or operation of this facility shall be taken without prior application to and approval by the LEA. (Public Resources Code § 44004).
- c) Stored recyclables shall not interfere with facility operations or cause a public health nuisance as determined by the LEA. The LEA reserves the right to reduce the maximum storage time of recyclables as necessary to protect health or prevent a nuisance.
- d) If the proposed dust control measures fail to adequately control dust from the operation of this facility, the LEA may require that additional measures be implemented.
- e) The operator shall maintain, and keep current, records of the types and weights of materials received per day. These records shall include the final disposition of transferred residual waste and recycled materials. (County Code of Regulatory Ordinances §65.107).
- f) The residual is calculated on a monthly basis based on the number of operating days by measuring the outgoing tonnage after separated for reuse materials have been removed. Residual amounts less than 25% shall be reported on the monthly tonnage reports and retained on site. Residual amounts greater than 25% shall be reported to the LEA with 30 days and will include a description of the residuals and efforts to control or minimize residuals to below 25%.
- g) The amount of putrescible wastes in the separated for reuse material shall be less than 1% of the amount of separated for reuse material received by weight, and the putrescible waste in the separated for reuse material shall not cause a nuisance and determined by the LEA.
- h) Additional information related to compliance with this permit or the design and operation of this facility shall be furnished to the LEA upon request.
